

Oriette Agaard  
9621 Lonsdale Circle  
Minnetonka, MN 55305

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Kitty Aal  
2120 Pleasant Ave  
Minneapolis, MN 55404

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Cynthia Ahlgren  
1563 Fulham St.  
St. Paul, MN 55108

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Comcast's shameful act of stacking what was supposed to be a public event with paid seatholders in order to keep interested public out is criminal and should result in fines and loss of public access privileges. This is an outrage and it illustrates why this corporate giant should not be entrusted with protecting our rights to free speech on the internet.

Jesse Ahlman

3170 Kagen Ave NE  
St Michael, MN 55376

The Internet is a vital engine for economic growth, and secretly interfering with Internet traffic and stifling innovation will only hurt world economies at a time when many are experiencing challenges. It's the FCC's job to maintain and contribute to Internet functionality, not bring it down.

Andrew Birch  
4033 Plymouth Rd  
Minnetonka, MN 55305

I take Net Neutrality very seriously as a consumer, a small businessman and as a citizen of the free world. When a corporation chooses to limit services based on profit and simultaneously move to consolidate markets in their favor, I become alarmed, especially if I happen to be a customer. Comcast's blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. I do not believe it's corporate America's responsibility to regulate or monitor the personal behaviors of private citizens, whether they be legal, illegal or somewhere in between. That is the domain of law enforcement, in which we trust. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Minneapolis, MN 55406

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Jennifer Crowder  
5105 Fountain Lane North  
Plymouth, MN 55446

Three months ago, after moving into a new home, I ordered Comcast's "high speed" internet and noticed that downloading movies, music and even the transferring of images from my own computer to an off-site server was SLOWER than that of the DSL at a friend's small office. When I inquired, I was given a website to test the connectivity speed. This was all fine and good, except the uploads and download speeds from iTunes did NOT reflect that. I paid for 12MB/second and am receiving 1MB or 2MB at the most. I am a photographer and graphic designer and up and download large image files that take 3 to 4 times longer than they did a few years ago and I'm paying 1/3 more than I did back then. Why is this happening? Why is Comcast lying to my family and I and the rest of its customers? If I'm paying for email and web browsing, shouldn't I just go back to dialup or the less expensive DSL? It pisses me off that I only have ONE choice for high speed cable internet in the entire Minneapolis area. Why is this?? ~Jen Crowder \*\*\* Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Laura DeVries  
621 Gotzian St.  
Saint Paul, MN 55106

Please do not let Comcast get away with blocking user's paths in the internet. That is a violation of the rights of users that should be handled very sternly if we are to prevent this from becoming common practice.

Wendy Diedrich  
2438 Hadley Ave N

Oakdale, MN 55128

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. PS This is not China. This is the United States of America!

Carey Dissmore

308 West 136th Street

Burnsville, MN 55337

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. I myself have experienced this blocking activity first hand, when trying to execute perfectly legitimate file transfers across the Comcast network. I feel trapped as there is no other viable high-speed internet alternative where I live other than the Comcast service. The internet is critical infrastructure and needs to be kept open and free. This will contribute to greater innovation and business progress. Our society and economy is built upon free-flowing communications. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic

participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Sandy Dvorsky  
433 Mary St  
Maplewood, MN 55119

Since 2006 when I first learned about the issue of Net Neutrality, it became my TOP attention subject because I understand how corporate interference and profit-squeezing will give massive power to too few people. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this destructive practice. This example must be used to teach those who would interfere that the price is too high. Other Internet service providers are surely watching what will happen here and they must see the FCC crack down hard on this example of Comcast's discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. Corporate gatekeepers are tempted to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Comcast should pay a BIG PRICE for what they have done...so that none of those telcos will dare to mess around with this again.

Sandy Dvorsky  
433 Mary St  
Maplewood, MN 55119

Comcast PROVES the need for Net Neutrality protections. Their blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without that principle. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. Corporate gatekeepers want to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The arrogance of those corporate executives proves they are not even worthy to LIVE in America...because they SO threaten what America is about--Democracy.

Brooklyn Park, MN 55444

Broadcasting used to require a fair hearing of ideas. The Telecommunications Act, bowing to station owner's demands, stripped broadcasting of much of its public obligation. The Internet filled the gap in an historically monumental way. Free speech has never been freer. Small business benefitted from an open playing field. Now, with the consolidation of media ownership the media companies want the Internet for themselves, deciding who will be allowed to speak and who will not. This is the time to decide to let speech be free or to bow to Comcast and others, allowing them to control the data that flows on the Internet. Please consider the Internet to be like the RF spectrum used to be - open to all.

Janice Greenfield

St. Paul, MN 55116

The development of a truly free & open means of communication, the Internet, is a fabulous tool for democracy. It is essential that it remain free & open. We expect that you, as a guardian of this very important freedom, will halt Comcast's blatant and deceptive blocking of peer-to-peer communications. The American public is counting on you to protect and preserve this highly inventive & fabulously exciting new vehicle for the free expression of ideas -- the Internet. Please do not let ANY corporate group interfere with this freedom!

Carol Greenwood

We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The Public needs an Open and un-restricted Internet. It may just be our last bastion of Free Press, and might actually bring our Press back to it's intention, of Reporting and not Dictating the News.

Michael Griffin  
859 Ivy Ave W  
Saint Paul, MN 55117

Net Neutrality is an essential principal that must be upheld in order to maintain democratic and non-discriminatory use of the Internet as we go forward into the future. Comcast Corporation's practice of blocking peer-to-peer communications is exactly the problem millions of Americans have warned would occur without adequate protections to assure net neutrality. The FCC must fulfill its responsibilities to the American public and take immediate action to put an end to such blocking and to prevent other Internet service providers from engaging in any practices that discriminate among Internet users to inhibit the free flow of online information. The Internet must remain open to all U.S. citizens, providing equal access to economic and civic participation. It is anti-democratic for private companies to make decisions about who receives access to Internet communications and who does not, or to decide levels and speed of access for different groups.

Michael Griffin  
859 Ivy Ave W  
Saint Paul, MN 55117

Minneapolis, MN 55403

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. AND, IN ADDITION TO MY COMPLAINT ABOUT COMCAST, I WANT TO ADD A COMPLAINT ABOUT AOL. AOL HAS PUT A BLOCK ON MY INTERNET ADDRESS SO THAT ANY EMAIL I SEND TO AN AOL ADDRESS IS BLOCKED. I CAN RECEIVE MESSAGES FROM AOL EADDRESSES BUT ALL EMAIL I SEND TO AOL EADDRESS IS BLOCKED AND DOES NOT REACH THE INTENDED RECIPIENT. AOL INFORMED ME THAT THEY PUT BLOCKS ON EMAIL ADDRESSES BASED ON THE NUMBER OF COMPLAINTS THEY RECEIVE. IT DOES NOT MATTER WHAT THE REASON FOR THE COMPLAINTS; IF THE NUMBER OF COMPLAINTS REACHES A CERTAIN THRESHOLD, THE BLOCK IS PUT ON. IF YOU LOOK AT MY WEBPAGE AND BLOG, YOU WILL SEE THAT THEY CONTAIN CONTROVERSIAL THEOLOGICAL AND POLITICAL IDEAS. BUT THERE IS NO PROFANITY OR THREATS OR ADVOCACY OF ANY ILLEGAL ACTIONS. HENCE, AOL'S BLOCK IS CENSORSHIP OF UNPOPULAR IDEAS. THE FCC SHOULD NOT PERMIT A PRIVATE COMPANY TO CENSOR WHAT ITS SUBSCRIBERS MAY READ. THE INDIVIDUAL SUBSCRIBERS ARE FREE TO PUT A BLOCK ON EMAILS FROM ME IF THEY DON'T WANT TO READ THEM BUT THE FCC SHOULD NOT ALLOW AOL TO DECIDE FOR ITS CUSTOMERS WHAT THEY ARE ALLOWED TO READ.

While the companies that control our access to the internet need to ensure that the signal is consistent and strong, that what we as consumers pay for is delivered as promised, they must be clear with how they provide that service. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation, free speech, education, and overall mass communication. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Perhaps the government needs to provide cities with the option of providing city-wide web to their residents that is beyond their companies and that by law does not restrict these free-flow exchanges. One thing is for sure - net neutrality really does need to be considered and strict and appropriate penalties need to be imposed upon those entities that violate those laws.

"Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. "The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. "The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation." As a Comcast user, I believe these statements are truthful and prescient. I have had trouble with Comcast in the past, not only because they're gouging me with their internet costs and telling me I need basic cable when I don't, but because I'm a frequent downloader of independent film and music that can only be accessed by those networks Comcast is refusing to allow through their filters. Please don't let the internet become like network television. I want a diversity of views, opinions, and opportunities--even if they seem contrary to my values and good judgment. I want you to punish Comcast for what they have done. They deserve it. For the price I'm paying \$60 (and only because Comcast has a monopoly in my area on cable lines), I should be able to use AS MUCH bandwidth as I want. How much bandwidth I

use shouldn't even be an issue considering that America's bandwidth infrastructure is one of the worst in the world....because you, the FCC, refuse to regulate and maintain standards in the field. Sincerely, Jonathan Hatch

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Scott Jilek  
6772 7th St N  
Oakdale, MN 55128

Comcast engages in deceptive marketing practices, and damages the internet as a whole because of its own corporate interest. It has FAR too much power to control the internet because it operates with monopolistic actions. There needs to be stricter oversight of Comcast to ensure it practices net neutrality and allows fair access and free speech for all paying customers. THE INTERNET SHOULD BE OPEN, FREE AND FAIR. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

David Johnson  
853 Bradford Ave  
Champlin, MN 55316

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. But I suspect the problem has gone much further. I have been a customer of Comcast for about 4 years. Since recent upgrades, certain websites such as Amazon and Google take much longer to load. Images on these sites also have become much slower. When I immediately switch to a Comcast site, the response is quick and immediate, images load without delay. There have been times where entire internet domains have become temporarily inaccessible from the web. For example, for an entire weekend about a year ago, the .us domain was inaccessible from Comcast. When I checked with DSL using friends, they had no problem accessing the .us domain. The same problem has happened with the .bz domain and others over the past year periodically. Clearly,

Comcast has been tinkering with it's domain servers setting up priorities for usage. Worse yet, any complaint I have made to Comcast has not brought a reply, or even an acknowledgment of receipt. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Terry Johnson  
1784 Peltier Lake Drive

Harmony,, MN 55939

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Ryan Johnson  
674 86th Lane NW  
Coon Rapids, MN 55433

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Regulate businesses and reduce corporate power. Corporate power has got out of hand, be a strong FCC and install Net Neutrality protections.

Matt L  
Cheyenne Trail  
Edina, MN 55439

No, no, no! I cannot stand by and watch this happen. Net neutrality is too important an issue to simply wait around and let the world be bullied about by corporations. Access to information is at the heart of this matter, and the telecommunications companies have absolutely no right to filter, tamper with, restrict, or censor that information in any way. This is a simple issue with strong precedent. Imagine a library. Once the library card is payed for, one has free access to any book one chooses. One may check these books out at any time. Due to scarcity of books, these checkout times are limited. On the internet, there is no scarcity other than bandwidth, and that is covered as part of the 'library card.' If net neutrality were denied, the way the internet could be used would change. In the library scenario, one would purchase a library card, and then one could look through the pamphlets and advertisements of the corporate sponsors. If said person pays more, they can view the newspaper section. If they pay even more, they can view the encyclopedias, dictionaries, and other resource material. If they pay more still, they can view all the books that don't speak out against anything the corporate sponsors don't want you to hear. In this system, without net neutrality, only the wealthy have access to the information, and only those providing the access would control it. Corporations don't own the information any more than libraries own the words in their books. Those words are the sole property of their respective authors. Libraries are not supposed to keep a record of your check-out activity and discriminate against you based on what you read. Without net neutrality, Democracy, free speech, and American culture would suffer potentially irreparable damage. I sincerely hope that you take the future of the country into consideration when you assess this issue, and act in such a way that best serves the people of America and the world, when you decide to maintain net neutrality. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Rochester, MN 55904

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Blake McElrath

3616 Kipling Ave  
St. Louis Park, MN 55416

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

1166 Lawson Ave. E.  
St. Paul, MN 49024

Comcast should be severely punished for breaking net neutrality. If the company is not punished, it will set a very dangerous precedent. Americans need their basic right of freedom of information protected. Please accept this as my public comment on FP-007. Thank you.

I agree that comcast should not be doing this, however I cannot allow my internet here to be killed off. I live in Minnesota and comcast is THE only available cable internet provider i can have. I do not want them to disappear being they give very fast internet and its going to get faster. I think comcast should be punished but not killed off or punished and then it hurts the customers too. Thanks, Adam Moore

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I have no other high speed option where i live. 5 neighbors around me have tried dsl, but we live too far from a central office. If we had choice, we would switch. But we can't. We live in an area unlike asia or europe where we have multiple choices and better speeds and prices. We have one low speed at one high price. And now this has become poor service with questionable and illegal behaviors by a monopolistic company. Comcast should be fined 1,000 per day, per customer effected, until they release these packet shaping restrictions, provide speeds of 10mbps (they accepted tax incentives to provide this), and a price of \$30 per month. That money should then be used to fuel competition which will inherently give the public this level of service and speed. And that is governments responsibility. Provide to the public, when the masses need and want, and the market can't provide.

Dia Redman  
2105 North 1st street north  
North St Paul, MN 55109

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. And now blocking public meetings? Intolerable!

Larry Ellis Reed  
1723 W. Broadway  
Winona, MN 55987

Comcast's blatant and deceptive blocking of peer-to-peer (P2P) communications is exactly the problem millions of Americans have warned (and been warned) would occur without proper Net Neutrality protections. The FCC must take action With All Reasonable Speed, putting the Greater Public Good above Prevailing Political Ideology to put a stop to this harmful and dangerous practice and prevent other Internet service providers from following Comcast's example of discriminating against the free and healthy flow of online news and information. (As a matter of fact, you may or may not have heard that the likes of AT&T and Verizon are considering the likes of actions similar to those in question in this particular instance.) The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't, in the interest of the public good, allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. And Another Thing: How about forcing some seriously healthy competition for broadband Internet, especially so in rural and low-income areas still considered fit only for dial-in service, if the desire is one of promoting free-market competition and lower prices? Or what stands in the way--"political reasons"?

Scott Reynolds  
3335 25th Avenue South  
Minneapolis, MN 55406

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Michael Rhodes

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. This country prides itself on its great freedoms, don't show the world that those freedoms mean as much as the supposed "free Cuban elections". An internet controlled by the corporation that distributes it is like (simply an example) Times-Warner controlling all the news going in and out of New York. It gives up core economic freedoms and social liberties to profit a reckless laissez-faire.

We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. In addition, please change the rules to open up competition to provide bandwidth. Other than a local cable and telco provider, most homes have no other choices for internet access. While Japan and many other countries offer cheaper and much faster internet, we're having to deal with expensive and now restrictive access. How is that good for our economic growth?

St. Paul, MN 55104

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Rebecca L. Stack Stack  
rebeccastack@comcast.net  
Minneapolis, MN 55411

I am a current Comcast customer soon to be a "past customer" of Comcast (or, might I say: Com-caustic). I'm am not interested in the corporate games of inappropriate gain, profit and power. I dislike some of the things Quest has done as well. So, I am forced to choose (and pay for) the lesser of two evils. So much for having more choice with capitalism. And please don't give me that bohunk that it's a free enterprise system where the best product/service wins! There's nothing free about our current poor system of enterprise. It's about power, as in the allmighty BUCK! I would love to truly have a choice here in the Material West. But, sigh, we have allowed Corporate City-States to dominate and take over our supposedly shared marketplace. We no longer live in a democracy. We live in a moneocracy. In the 20th century we discovered that money was more important than people (above "the people"). In the 21st century we will discover that

money is now above the law ("the planet"). Ultimately, when we allow "profits" to suppress everything else we become out of balance and stop listening to our "prophets." Then we "prey" on each other instead of "preying" for each other. Currently, this culture is in an economic feeding frenzy where the "haves" and the "have mores" (as Bush would call them) are winning and the great majority are losing. However, when one of us loses we all eventually lose, for we are all ONE> Makes sense then that a huge proportion of the population are permanently on anti-depressants--it's depressing to actually hurt one's brother and sister. Suicide is at an all time high and chronic disease--well let us just say that this is ongoing fodder for creating and maintaining one of the largest multi-billion dollar industries in this great industrial nation. Need I say more! Yes, let me finish with this: Wow, people must just be clamoring to live here in the States. Such a happy, carefree, kind place--NOT! Sincerely, Rebecca L. Stack Small business owner, mother of two, community (block club leader) activist, church leader (Sunday school teacher, etc.) Student of A Course in Miracles

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. It's hard to believe a federal office would tolerate this sort of thing. Is it common? Is this how the rich and powerful use your offices? What other controversies have been "resolved" in this fashion, under your auspices? Since I bothered to give you my required address, i would like you to bother to write to me, and tell me about how this happens -- how often -- who else does this? Tell me the names of the companies - as I will not do any business with them either. Does the FCC itself use these meetings to catch up on sleep? Is this Georgie B's idea? Were you thinking it would be funny?

Kathryn Troxel  
38-21st Ave South  
St. Cloud, MN 58102

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

I assume you are fond of entrepreneurship and would hope you realize that Net Neutrality fosters the creation of new, imaginative, internet-based companies that may be tomorrow's Google. Limiting their access to every internet user in favor of giving a few, established companies better and/or faster access than the smaller, fresher companies could severe limit innovation.

Don't we have enough corporate BS in our lives? Leave the web to the people.

Naomi Williamson  
1436 Royal Oak Court  
Fridley, MN 55432

Recently I was forced into the position of contracting with Comcast for internet service because they are the only cable company allowed to sell in my neighborhood - and because the local phone company is incapable of delivering high speed internet to my street. Since Comcast has been allowed to gain a monopolistic position in my market, they have huge power already because I do not have carrier choice. Where uncompetitive situations like this have been allowed to develop by the Regulators, it is even more imperative that the practices of this company not be allowed to impinge on the free flow of communications without prior restraint. I had a similar issue with a previous internet provider blocking political messages as spam. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

David Wolff

960 Summerfield Dr  
Northfield, MN 55057

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.
